

# Dell Precision T3400 Video Card Replacement

This guide provides the necessary steps to successfully replace the video card in the Dell Precision T3400 desktop computer.

Written By: Josette Cormier

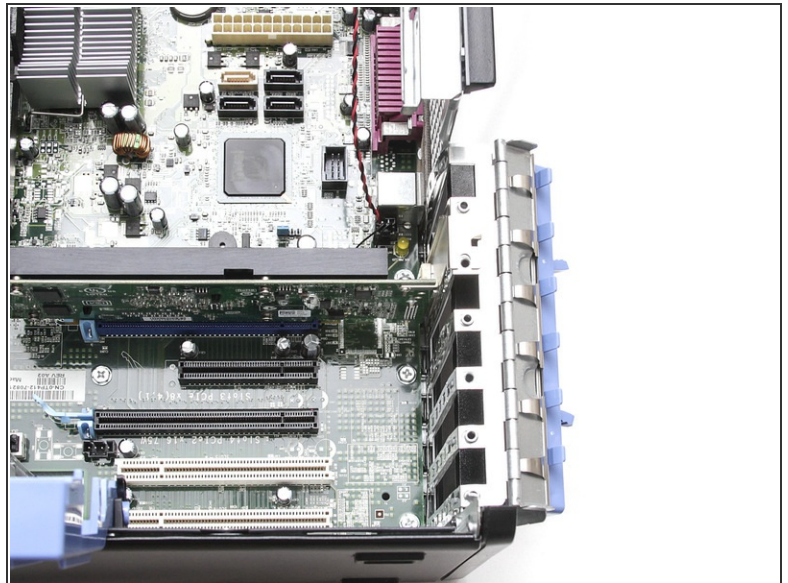

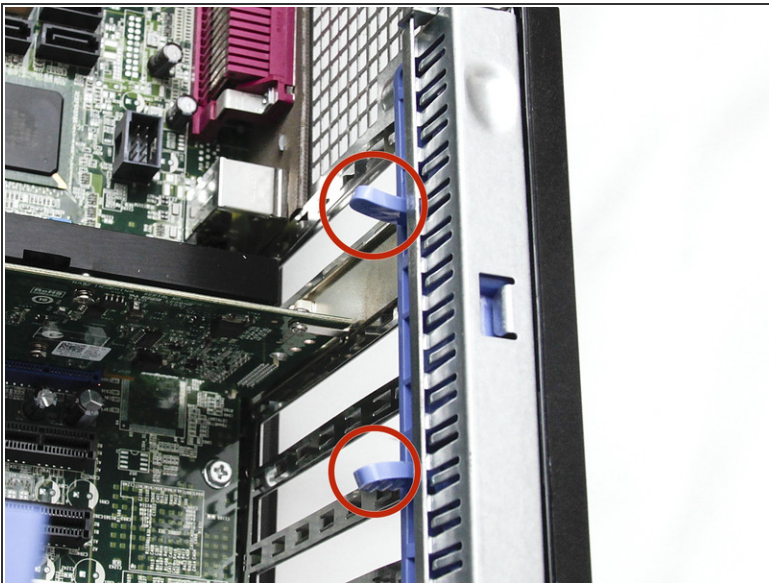

## Step 1 — Move the heat-sink assembly lever out of the way

- Push the tab on the blue plastic secure lever and pivot the lever down and away from the assembly
- ⚠ Make sure you ground yourself to prevent static discharge

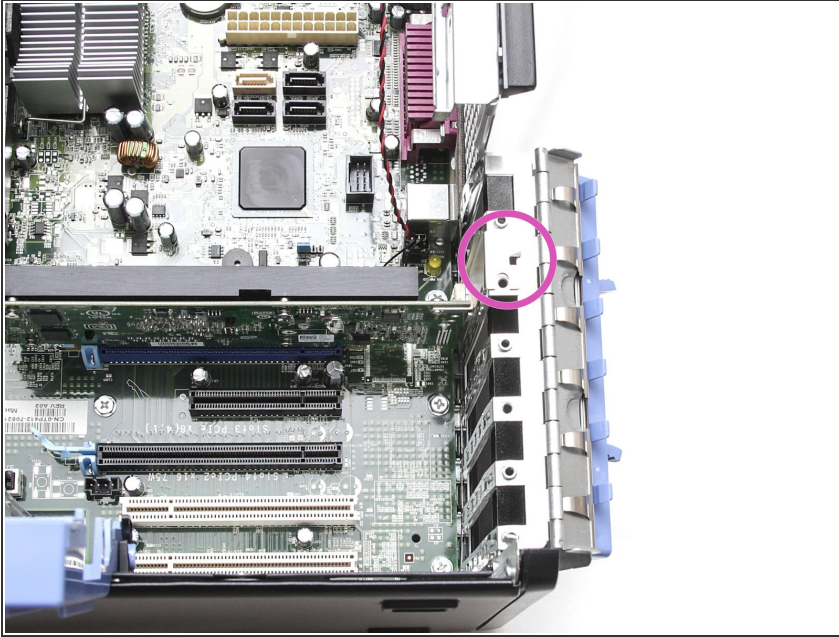

## Step 2 — Open the video card secure hatch.

- Squeeze the two release tabs together and pivot the secure hatch to the right to open.

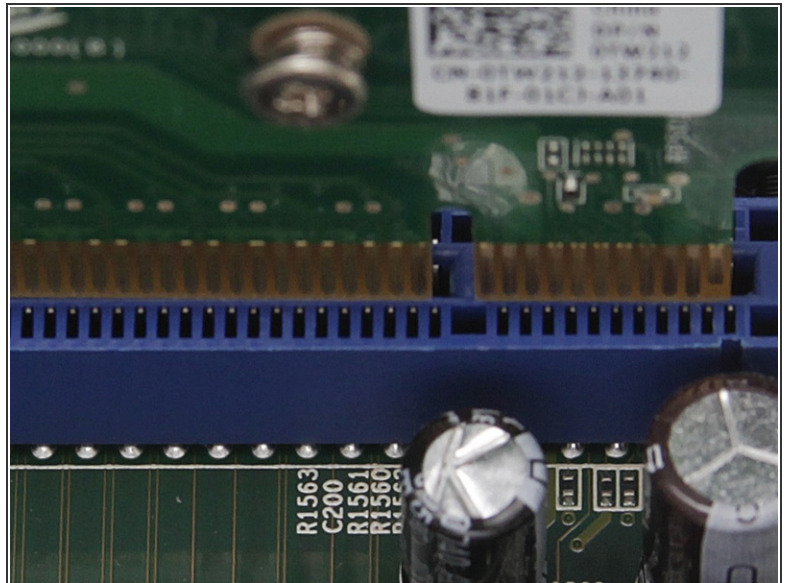

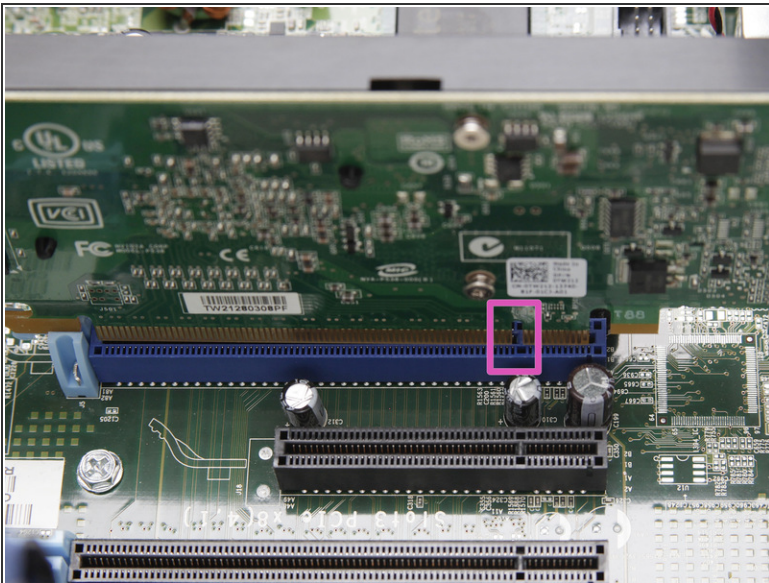

### Step 3 — Remove the video card

- Hold the card by its top corner and **metal bracket** and pull it out of its slot.

### Step 4 — Install the new video card

- Match the new card's connectors with the notches in the slot and gently push it into place. The card should click into position when inserted correctly.
- Close the card door and move the blue plastic secure lever back into place.

To reassemble your device, follow these instructions in reverse order.
